Vehicle: Yes, Full UK Licence

Profile:

I'm a location Sound Recordist with an extensive location sound kit fit for recording in almost every environment imaginable. I have 14 years of experience that covers TV entertainment, commercials, documentary and feature films - where I started - so my skills are especially rounded. Apart from shoot days, one of my favourite parts of any job is designing a sound solution which compliments the needs of the production and its work flow and ultimately get the best result possible. I'm very reliable, friendly and easy to work with.
